APPLICANT : FUJI PHOTO FILM CO LTD;

INVENTOR : NAKAI YASUSHI;

INT.CL. : G03C 7/42

TITLE : BLEACHING CONCENTRATED COMPOSITION AND PROCESSING METHOD USING
THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To provide a bleaching or bleach-fixing concentrated composition which reduces stain due to a residual sensitizing dye in a photosensitive material after processing, is excellent in desilvering performance, ensures little bleach fog and does not cause precipitation or deposition even when allowed to stand at low temperature over a long period of time.

SOLUTION: The bleaching or bleach-fixing concentrated composition for silver halide photographic processing has pH 3-7 and 20-60g/l iron ion concentration and contains an iron chelating agent in an amount (mol) 1-3 times the iron ion concentration and at least one triazine compound of formula (I) not having a triazinylstilbene structure.
